

WE NEED YOUR HELP!

Our sewer system at Weaver Mountain Estates is designed to process human waste and toilet paper ONLY.....NOT towels, rags, sanitary napkins and especially not WIPES! Those items clog the pipes and disrupt the natural degradation of the waste. Even though “wipes” advertise that they are biodegradable, they are NOT. Also, please do not dispose of cooking grease down the plumbing drains; absorb it in paper towels and dispose with normal solid waste material. Thank you for your help in maintaining our sewer system.
